

***Executive summary of the Anti-subsidy complaint concerning Imports of new and retreaded tyres for buses or lorries originating in the People's Republic of China***

**Legal basis**

This request is lodged under Regulation (EU) No 2016/1037 of 8 June 2016 on protection against subsidized imports from countries not members of the European Union, and in particular Article 10 thereof.

**Applicant**

The complaint is submitted by the Coalition against unfair tyres imports, an ad hoc association of European Manufacturers of Tyres for Buses or Lorries, acting on behalf of European companies active in the production of tyres for buses or lorries, also known as medium and heavy commercial vehicle tyres. The coalition represents more than 25% of the European Union production of the product concerned.

**Product concerned and like product**

“Certain pneumatic tyres, new or retreaded, of rubber, of a kind used for buses or lorries, with a load index > 121 falling under CN codes 40112090 or 40121200 ” (hereinafter “Certain pneumatic tyres for buses or lorries”).

As equivalent products are widely produced in the Union, pneumatic tyres for buses or lorries produced in the EU should be considered as being like to the product concerned in term of manufacturing process, physical characteristics, use, marketing and distribution.

Custom classification of pneumatic tyres for buses or lorries tyres covered by this complaint:

- New pneumatic tyres, of rubber, of a kind used for buses or lorries with a load index exceeding 121. In the EU Combined Nomenclature, this product fall under the CN code 4011 20 90.
- Retreaded pneumatic tyres, of rubber, of a kind used on buses or lorries with a load index exceeding 121. In the EU Combined Nomenclature, this product fall under the CN code 4012 12 00.

Retreading of tyres

Retreading is the process during which worn tyres are re-manufactured through a replacement of the tread on the same initial structure of the tyre, the casing. This process allows to limit wastes and to ensure a reasoned use of natural resources.

**Country concerned by the present complaint**

People's Republic of China.

**Other known parties concerned**

Fleet owners are the primary users of tyres for buses or lorries. Other parties concerned include distributors and retailers of tyres as well as truck and buses manufacturers.

## **SUMMARY OF THE COMPLAINT**

The complaint brings prima facie evidence that Chinese subsidized imports of the product concerned are causing material injury to the EU industry of the like product.

### **Subsidies**

The complainant provides a description of the relevant subsidies available for the production, processing and export of the tyres for buses and lorries under Chinese law.

### **Injury**

Imports of new tyres from China have increased by more than 80% between 2013 and 2016 at low prices and thus caused injury to the EU manufacturers of new and retreaded tyres. Over the same period the EU industry exhibited a strong decline of its performances materializing a high level of injury.

### **Causality**

The evolution of prices of imported tyres, the level of price undercutting of EU tyres by Chinese ones the serious damages, suffered by the lower segments of the industry with an obvious risk of further aggravation of the injury, the coincidence in time between the increase in imports and the deterioration of the situation of the EU industry leave no doubt as to the existence of a causal link between the Chinese imports and the injury.
