

Executive Summary

of the

Anti-Subsidy Complaint under Article 10 of Regulation 2016/1037 concerning electric bicycles from China

Submitted by

**EUROPEAN
BICYCLE
MANUFACTURERS
ASSOCIATION**

Prepared by

fieldfisher

1. Product description

The product concerned by this Complaint is cycles, with pedal assistance, with an auxiliary electric motor, currently falling under CN codes 8711 60 10 and ex 8711 60 90.

The product concerned covers in particular:

- EPACs, i.e., cycles with an auxiliary electric motor which has a continuous rated power not exceeding 250 watts; and
- Speed EPACs, i.e. cycles of vehicle category L1e-B which have a weight less than or equal to 35 kg and an auxiliary electric motor providing propulsion power which is added to the driver's pedal power, and the total power does not exceed four times the actual pedal power,

originating in or exported from China.

The common features of the product concerned are that:

- they are cycles designed to pedal (indicated inter alia by the fact that in their finished state they are fitted with pedals enabling the vehicle to be propelled solely by the rider's muscular leg power, the fact that the vehicle will not move if the rider does not pedal initially, and the fact that they normally have adjustable rider positioning);
- they feature an auxiliary electric motor which provides additional propulsion power (i.e. additional to the driver's muscular pedal power).

Since 1 January 2017, EPACs have been classified under CN code 8711 6010 and speed EPACs under CN code 8711 6090. Before 2017, EPACs were classified under (ex) CN code 8711 9010 and speed EPACs under ex CN code 8711 9090. The product concerned is subject to a 6% EU customs duty upon importation.

2. Summary of the Complaint

The European Bicycle Manufacturers Association ("EBMA", the "Complainant"), on behalf of Union producers of electric bicycles, requests that the European Commission ("Commission") initiate an anti-subsidy ("AS") investigation pursuant to Article 10 of the Basic Regulation concerning imports of electronically power assisted cycles ("EPACs" and "Speed EPACs", together "electric bicycles" or "e-bikes") from the People's Republic of China ("China") ("product concerned") with a view to the imposition of AS measures for a five-year period ("the Complaint").

EPACs are an invention of the EU e-bike industry which has invested hundreds of millions of euros in this high-tech product over the last 20 years. E-bikes are an important contributor to the EU's environmental and climate change targets as they have the potential to change urban traffic significantly. They are at the forefront of the Intelligent Transport Systems initiative, a priority for the European Commission which will improve safety in the transport sector, and play an increasing role in urban transport.

Since 2014, dumped and subsidised e-bikes from China have increasingly penetrated the EU market. Imports into the EU of e-bikes from China increased from virtually zero at the beginning of the decade to approximately 220,000 pieces in 2014, and subsequently skyrocketed to over 311,000 pieces in 2015, to over 433,000 pieces in 2016, and to 613,000 pieces in the IP (2016 Q3 to 2017 Q2).

The Chinese e-bike industry is a highly encouraged industry under the 13th 5 Year Plans. Accordingly, Chinese e-bike producers have received ample (direct and indirect) contributions from national, regional and local governments in the form of: (i) direct transfers of funds (within the meaning of Article 3(1)(a)(i) of the Basic Regulation); (ii) government revenue forgone or not collected (within

the meaning of Article 3(1)(a)(ii) of the Basic Regulation); (iii) the provision of goods and services at less than adequate remuneration ("LTAR") (within the meaning of Article 3(1)(a)(iii) of the Basic Regulation); and (iv) payments to a funding mechanism or the entrusting or direction of a private body to carry out one or more of the above functions (within the meaning of Article 3(1)(a)(iv) of the Basic Regulation).

Imports of the product concerned have undercut and undersold the EU industry by substantial margins during the period under consideration. They have caused material injury to the EU industry and threaten to cause further material injury. Indeed, EU imports of EPACs from China have already exceeded 2016 volumes during the first seven months of 2017 and further increased by another 112,000 pieces in August and September, as Chinese producers try to find relief abroad for their State-subsidised overcapacities and the EU is the largest market worldwide for EPACs.

Considering the surge in imports during the first nine months of 2017, it is necessary to register imports from the opening of the investigation so as not to undermine the remedial effect of potential (provisional) measures.

The imposition of AS duties on imports of e-bikes from China would re-establish a level playing field and is not contrary to the overall Union interest.
