

NOTIFICATION UNDER ARTICLE 12.1(c), 12.2, 12.3 OF THE AGREEMENT ON SAFEGUARDS

NOTIFICATION PURSUANT TO ARTICLE 9, FOOTNOTE 2 OF THE AGREEMENT ON SAFEGUARDS

Pursuant to Articles 12.1(c) of the Agreement on Safeguards, the European Union (‘the Union’) submits a notification of proposed adjustments to safeguard measures following a Review investigation. This notification contains all pertinent information relating to the proposed adjustments to safeguard measures in accordance with Article 12.2 of the Agreement on Safeguards and an offer of consultations pursuant to Article 12.3 of the Agreement on Safeguards.

- (1) Recital (161) and Article 9 of Regulation (EU) 2019/159 (‘the definitive Regulation’)¹ noted that based on the Union interest, the Commission “*may have to adjust the level or allocation of the tariff-rate quota . . . in case of changes of circumstances during the period of imposition of the measures*” and that such a review should commence “*no later than 1 July 2019*”. In light of that consideration, on 17 May 2019², the Commission initiated a Review of the definitive Regulation. [G/SG/N/10/EU/1/Suppl.2]
- (2) The European Commission (‘the Commission’) invited parties to make their views known, submit information, and provide supporting evidence concerning the five grounds of review identified by the Commission in the Notice of Initiation of the Review Investigation. Interested parties were also allowed to make comments on and formulate rebuttals to each other’s comments.

1. Provide precise description of the product involved

- (3) The product concerned is certain steel products belonging to the 26 steel product categories listed in Annex I.

2. Provide precise description of the proposed measure

- (4) It is proposed to introduce several adjustments to the definitive safeguard measures that are in place since 2 February 2019. The summary of the findings and corresponding adjustment proposals is organised within the five sub-categories corresponding to the five grounds of review identified in the Notice of Initiation of the Review Investigation.
- (5) Through these adjustments, the Commission has considered to strike an appropriate balance between the legitimate rights of the different parties in line with the Union interest.

¹ The full legal text of the definitive safeguard measures is accessible on the following link: <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32019R0159&from=EN>

² Notice of Initiation concerning the Review of the safeguard measures applicable to imports of certain steel products (C/2019/3623) OJ C 169, 17.5.2019, p. 9 (hereafter “Notice of Initiation of the Review Investigation”).

A. Level and allocation of the Tariff-Rate Quota ('TRQ') for a number of product categories

- (6) In the Notice of Initiation of the Review Investigation, the Commission announced that it would investigate whether changed circumstances had occurred since the adoption of the definitive measures, including whether there was evidence of a substantial increase or contraction in Union demand, a risk of shortage of supply, or an unduly restriction to the ability to export to the EU.
- (7) As a result of the analysis carried out, the Commission has concluded that, in overall terms, the TRQ levels established in the definitive measures did not unduly restrict trade flows but rather ensured that traditional trade flows were maintained commensurate with the Union market needs. In this respect, the Commission has observed that, during the first year of application of the safeguard measures, over 3,2 million tonnes free-of-duty imports were not used. Moreover, no meaningful evidence of alleged offer shortfall caused by increased demand has been provided by interested parties.
- (8) Nevertheless, when looking into specific product categories, the Commission has concluded that a series of adjustments to the allocation of TRQ are necessary to improve its functioning for the following individual product categories: 1 (hot-rolled flat products), 4 (metallic coated sheets), and 25 (large welded tubes).

Category 1 (hot-rolled flats)

- (9) In the definitive safeguard measures, the Commission concluded that it was in the Union's interest to adopt a single system of global TRQ administered on a quarterly basis for this product category, in order to avoid the risk of shortage a country-specific allocation could unduly generate.
- (10) However, in the framework of the Review, the Commission has observed relevant changes in the evolution of imports for this category on the basis of more recent statistical data on imports. These statistics cover the full year 2018 (not fully available at the time of adopting the definitive safeguard measures) and the TRQ use during the first period of application of definitive measures (2 February – 30 June 2019).
- (11) With respect to category 1, the Commission has noted that Russia, despite being subjected to anti-dumping measures, has recovered a substantial part of its historical trading volume. In addition, some of the other countries subject to anti-dumping measures were able to continue exporting, though in smaller amounts. In view of this evolution of imports, which could not be foreseen when the definitive safeguard measures were adopted, the Commission has found that the level of imports significantly affected by trade defence measures is substantially lower than expected.
- (12) The Commission has also noted that other exporting countries, most notably Turkey, India and Serbia, have been able to replace the import shares lost by those countries that reduced their level of imports following the imposition of the anti-dumping and countervailing measures. Thus, the risk of potential shortage of supply has been substantially reduced.
- (13) Accordingly, the Commission has considered that it would be in the Union's interest to amend the TRQ allocation for product category 1 and make it more akin with the

mechanism used for the other product categories to ensure the preservation of trade flow origins to the best extent possible.

- (14) In this respect, however, the preferred system to guarantee trade flow origins under the definitive measures, namely a combination of a country-specific and a global residual TRQ, is not appropriate for category 1, because the relevant period used for establishing country-specific TRQ under the definitive measures, namely 2015-2017, would cause substantial offer shortfall.
- (15) Therefore, the Commission has decided that the most appropriate way to ensure the preservation of traditional trade flows for category 1, in both volume and origin terms, is to establish a limitation of 30% to the share in the global quota that any single exporting country can reach per quarter during the remaining duration of the measures.

Category 4 (Metallic coated sheets)

- (16) In the definitive Regulation, the Commission decided that it was in the Union interest to split category 4 (metallic coated sheets) into two sub-categories: 4A and 4B. The objective of that split was to preserve, to the best extent possible, the traditional level of imports for the EU automotive sector.
- (17) As part of the Review, the Commission has received numerous submissions highlighting that the current sub-division is not entirely effective in meeting its intended objectives. The Commission's analysis upon review of the definitive measures confirms that traditional trade flows for products falling within category 4B have indeed been disturbed.
- (18) Accordingly, the Commission has considered it in the Union interest to adjust the functioning of the TRQ for category 4, in such a way that the use of category 4B is restricted to only imports that can demonstrate an end-use in the automotive sector.
- (19) To this end, imports under category 4B will continue being subjected to the safeguard measures but, as regards formal requirements, will be placed under the end-use procedure referred to in Article 254 of Regulation (EU) No 952/2013³.
- (20) As a consequence, an adjustment to the relevant CN codes falling under categories 4A and 4B is necessary. The scope of 4A will be extended to also include all CN codes previously falling within category 4B. At the same time, the scope of category 4B would be kept unchanged.
- (21) As the information available to the Commission on imports from India indicates that this country does not export any relevant quantities for use in the automotive sector, India will be granted a single country-specific TRQ under 4A (combining the volumes of the country-specific quotas previously allocated under 4A and 4B). Except for this change, the current allocation of TRQ to the remaining exporting countries would in principle remain unchanged.

Category 25 (large welded tubes)

³ OJ L 269, 10.10.2013, p. 1–101

- (22) The analysis of the relevant import data has showed that imports from Russia, which is the country with the largest country-specific TRQ, have sharply declined after a massive surge in 2017. This consistent downward trend has accelerated during the period of application of definitive safeguard measures in line with the decreasing needs of an ad-hoc engineering project. Therefore, Russia has largely underused its country-specific TRQ during the first period of measures, while other exporting countries have showed a consistent high use of their country-specific and global TRQ.
- (23) The Commission has thus considered that it is necessary to replace the existing TRQ with a single global TRQ administered on a quarterly basis. This change is more apt to limit the risk of potential shortage of supply stemming from an inadequate allocation of TRQs. At the same time, it ensures adequate diversity of supply and equal opportunities for all potential suppliers to participate in any new engineering project requiring this product category.

B. ‘Crowding out’ of traditional trade flows

- (24) The Notice of Initiation of the Review Investigation pointed out that, for certain product categories, one or several countries benefiting from a country-specific TRQ had rapidly exhausted the global residual TRQ during the last quarter, crowding out traditional import flows from other origins. The Commission therefore committed to investigating whether this fact had adversely affected the Union’s interest, in particular regarding the need to maintain traditional trade flows by origin and, where appropriate, to decide on potential remedies for this situation.
- (25) The Commission’s analysis under the Review has revealed that, for two product categories, namely 13 (rebars) and 16 (wire rod), the mechanism put in place to ensure that the TRQ is fully used has led to unintended effects. In fact, for these two product categories, smaller supplying countries that had regularly used the global TRQ in the period 2 February – 31 March 2019 were not able to export in the last quarter any substantial volumes under the TRQ, because other countries benefiting from a country-specific TRQ had used virtually the whole residual TRQ in the last quarter, sometimes in a matter of days.
- (26) The Commission has therefore considered it necessary to put in place a quantitative cap of 30% per supplying country of product categories 13 and 16 during the last quarter during the remaining life of the measures.
- (27) Such a cap would not artificially restrict the access to the residual TRQ to any particular origin and would guarantee sufficient variety in the sources of supply for users in the Union.

C. Potential detrimental effects in achieving the integration objectives pursued with preferential trading partners

- (28) The Commission has also investigated whether the functioning of the existing definitive measures has caused any substantial risk to the stabilisation or economic development of certain preferential trading partners, namely Bosnia and Herzegovina,

the Republic of North Macedonia and the Republic of Serbia, to an extent that would be detrimental to the integration objectives of their agreements with the Union.

- (29) This analysis has showed that, for the product categories exported by these countries, either there were still volumes available under their country-specific TRQ at the end of the first period of application of the measures (30 June 2019), or that, when they were exhausted, these countries were able to continue exporting to the Union until the exhaustion of the corresponding residual quotas. Furthermore, when such exhaustion happened it was generally only a few weeks before the release of new quotas for the second period of measures on 1 July 2019.
- (30) In view of these elements, the Commission has concluded that the definitive measures do not markedly limit the ability for these countries to export steel to the Union. This fact, coupled with the additional export margin that the quota increase resulting from the liberalisation of the measures as of 1 July 2019 will provide, has led the Commission to conclude that the current TRQ is not producing detrimental effects to the integration objectives.

D. Update of the list of developing WTO member countries excluded from the scope of the measures based on updated import statistics

- (31) Following the adoption of the definitive safeguard measures, the Commission committed to reviewing, on a regular basis, the list of developing countries potentially excluded from the scope of the measures based on updated import statistics.
- (32) For establishing the list of exclusions from the definitive measures, the Commission used the most recent data available at the date of adoption of the definitive measures, i.e. second half of 2017 – first half of 2018. For reviewing the list, the Commission has used a more updated and representative set of consolidated statistics, i.e. the full year 2018.
- (33) The results of this analysis are presented in Annex II.

E. Other changes of circumstances that may require an adjustment to the level of allocation of the TRQ

- (34) When the Commission adopted the definitive measures, it decided a liberalisation pace of 5% + 5%, i.e. the total volume of quotas made available for the second and third period of measures (i.e. July 2019-June 2020 and July 2020-June 2021) should be 31,6 million tonnes and 33,2 million tonnes respectively. At this moment, there were no consolidated and reliable imports' statistics for 2018.
- (35) Yet, at the same time, it committed to review them and make any necessary adjustment to keep the definitive measures adapted to the evolution of the EU steel market and the interest of the Union.
- (36) As a matter of consistency, the liberalisation of any safeguard measures should not undermine their intended effect. This intended effect is to shield the domestic market from imports for as long as it is necessary to prevent or remedy serious injury and to facilitate adjustment, as Article 7 (1) of the WTO Agreement on Safeguards allows.

- (37) The consolidated imports' statistics for 2018 were only issued several months after the Commission had adopted the definitive safeguard measures. These statistics show that the total imports of steel products under measures in 2018 reached a record of 33,4 million tonnes, i.e. almost 5 million tonnes more than the average of 2015-2017 and over 3 million tonnes above the 2017 level, which were the reference period used for the analysis contained in the definitive measures.
- (38) The total imports of steel products under measures in 2018 were substantially higher than the previous years' level, which led the Commission to adopt safeguard measures, because it caused a threat of serious injury to the Union industry and, therefore, was highly distorting the functioning of the Union market
- (39) The analysis of the 2018 imports' record reveals that it contains substantial trade diversion flows and considerable out-of-measures imports that took place before the provisional measures were adopted in July 2018, and thereafter under the shipping clause in Article 4 of the provisional Regulation. Therefore, the acceptance under the definitive measures of imports of 33,2 million tonnes during the third period of measures, a similar level to that recorded in 2018, would serve to further materialize the threat of serious injury and, in this way, would compromise the "effet utile" of the definitive measures.
- (40) Against this background, following an in depth assessment of the functioning and effects of the existing safeguard measures, the Commission has considered it appropriate to lower the liberalisation to a 3% + 3% pace for the second and third period of measures. This less pronounced liberalisation means that the total quotas available during the third period will be limited to 31,6 million tonnes, i.e. 1,5 million tonnes below the distorting 2018 record. Moreover, this adjustment will fully preserve the liberalisation effect, because the total quotas during the second year would be 31 million tonnes and so are about one million tonnes more than the level of imports measured during 2017. Moreover, this pace represents a more evenly distributed effort to facilitate the adjustment of the Union industry, with quota increases of 0,9 and 0,9 at the end of the first and second period of measures, and 1,5 million tonnes, to possibly reach the 2018 level, only after the expiration of the three-year duration foreseen in WTO and Union law.
- (41) This lowered liberalisation pace is also in line with the most-recently published general economy and industrial outlooks, which foresee a growth reduction for the Union and the world economy.

- (42) Following the adjustments described in sections A to E, the tariff-rate quota and the allocation of quotas among supplying countries are set out in Annex III.

3. Provide proposed date of introduction of the measure

- (43) The proposed date for the entry into force of the adjustments to the measures is 1 October 2019.

4. Provide expected duration of the measure

(44) The measures are expected to be in place until 30 June 2021, as foreseen by recital (187) of Regulation (EU) 2019/159.

5. For a measure with a duration of more than three years, provide the proposed date for the review (under Article 7.4) to be held not later than the mid-term of the measure, if such a date for the review has already been scheduled

(45) Not applicable

6. If the expected duration is over one year, provide expected timetable for progressive liberalisation of the measure

(46) Following the adjustment to the liberalisation pace referred to in section 2.E above, the definitive measures will be liberalised by increasing the level of the TRQ for all product categories by 3% for the second period of measures (1 July 2019 – 30 June 2020) and by an additional 3% for the last period of measures (1 July 2020 – 30 June 2021).

For this purpose, on 1 October 2019 (i.e. the beginning of the second quarter of the second period of measures) the remaining quotas for the second period of measures will be adjusted downwards, so that the total increase for the period is 3%. In addition, on 1 July 2020, that is, at the end of the second period of measures, all the free-of-duty quotas will be further increased by an additional 3%.

7. Provide information relating to the extension of a safeguard measure

(47) Not applicable

8. Exclusion of certain countries from the scope of the definitive measures

(48) The Review of the definitive measures shows that imports of certain product categories originating in a series of developing countries meet the requirements of Article 9 of the WTO Agreement on Safeguards and should therefore be excluded.

(49) The list of countries unconditionally excluded from the definitive measures as set out in recitals (190) to (193) of Regulation (EU) 2019/159 were not subject to the Review and thus continue to be excluded from the measures.

9. Procedures relevant to the decision to apply the measures and information regarding procedures for prior consultations with those Members having a substantial interest as exporters of the product concerned

(50) Members having a substantial interest as exporters of the product subject to the investigation that wish to consult with the European Union may make a request through the EU Mission in Geneva. These consultations shall be held (either in the form of a meeting in Brussels or via videoconference) preferably during the period **15 August – 30 August 2019**.

ANNEX I

List of product categories subject to the Review investigation

Product Number	Product category
1	Non Alloy and Other Alloy Hot Rolled Sheets and Strips
2	Non Alloy and Other Alloy Cold Rolled Sheets
3.A	Electrical Sheets (other than GOES)
3.B	
4.A	Metallic Coated Sheets
4.B	
5	Organic Coated Sheets
6	Tin Mill products
7	Non Alloy and Other Alloy Quarto Plates
8	Stainless Hot Rolled Sheets and Strips
9	Stainless Cold Rolled Sheets and Strips
10	Stainless Hot Rolled Quarto Plates
12	Non Alloy and Other Alloy Merchant Bars and Light Sections
13	Rebars
14	Stainless Bars and Light Sections
15	Stainless Wire Rod
16	Non Alloy and Other Alloy Wire Rod
17	Angles, Shapes and Sections of Iron or Non Alloy Steel
18	Sheet Piling
19	Railway Material
20	Gas pipes
21	Hollow sections
22	Seamless Stainless Tubes and Pipes
24	Other Seamless Tubes
25	Large welded tubes
26	Other Welded Pipes
27	Non-alloy and other alloy cold finished bars
28	Non Alloy Wire
