

Export of COVID-19 vaccines from the EU

Last update 22 July 2022

To ensure transparency in the exports of vaccines, the Commission has put in place a monitoring mechanism. The Commission will continue to monitor the ongoing epidemiological situation in order to take appropriate measures if necessary.

Number of countries the EU has exported vaccines to since November 2020	168
--	------------

EU exports of finished COVID vaccines since November 2020, number of doses	Total exported
---	-----------------------

Total all countries	2,473,552,248
Europe	387,021,772
